Tech Stats

Unity, C#, Blender, AR, VR,
XR, Rigging, Animating,
ARFoundation, XRToolkit,
UIToolkit, 3D modeling, Git
Photoshop, team-management

Profile

- **AR experience:** writing high-quality AR applications, using most ARCore and ARKit features, and creating good User Experience cases for both experienced and novel users.
- **VR experience:** Writing high-quality **VR Games and experiences**. Creating multiple minigames and experiences **autonomously**, within **tight deadlines**.
- **Unity and C#:** **Over 4 years** of learning Unity and C#, delivering high-quality products on time. Working with **Game Mechanics, AI Behaviours, UIToolkit, Shaders, VFX, SFX, Animation Systems, NavMesh, 3D and 2D physics**, etc.
- **3D Modelling and Animations:** experience with **Blender modeling, rigging, and animation**, while currently starting to learn more about **3D sculpting**.
- **Self-motivated and autonomous:** I've been working for 2 years at Unknown Games, a mobile games company I've cofounded with a friend. During this time we published 2 games, with the third one soon to come. During this time, we both developed **team and project management** skills while challenging ourselves in doing **marketing and sales**.
- **Mentorship:** For the last two years I've worked in a small-scale AR/VR studio where I've had the chance to receive mentorship directly from the lead developer, while directly working with the senior artist of the team. Most of our projects had a development team of 3 to 5 people, for projects of 3 to 6 months in length.

Professional Experience

Unity XR Developer at ColorfulCoding

(<https://colorfulcoding.com/>)

March 2023 - January 2025

România

Work Environment

I've been part of a highly experienced **AR/VR** team. I have received tasks that I had to autonomously solve, requiring software development and even researching new technologies and processes. As we were a small team, every script was analyzed in detail for any possible improvement and code reviews.

Responsibilities and accomplishments

- Developing **AR/VR** games and immersive experiences
- Delivering **VR** projects within very short deadlines, clean and debuged.
- Testing and bug-fixing existing applications
- Developing solutions for spatial **AR** object placement
- Working on a 3D shooter
 - Developed a complex State Machine for a 3D Shooter in **C#**
 - Developed a Behavior Tree for bots of a 3D Shooter in **C#**
- Interactive AI NPC system
 - Implementing a pipeline of text-to-speech and speech-to-text for an AI NPC.
 - Developing an AI-backed system that enables NPCs to interact with users realistically.
 - Improved the response time of the mentioned NPC by 60%
- Learning and successfully delivering a ThreeJS-based website within 2 weeks.
- Modeling and animating 3D elements
- Using UIToolkit to help develop a mobile app
- Respecting short deadlines and release dates

Tech stack: **Unity, C#, Blender, ARFoundation, XRToolkit, ChatGPT API, Eleven Labs, Convai.ai, Imworld, UIToolkit, 3D modeling, Git**

Co-Founder, TravelAssistant

December 2024 – PRESENT

Work Environment

Developing an AR application for Zurich Tourism.

- Creating **AR** Experiences over Zurich Murals
- Implementing a map with all **AR** Locations
- Managing all the Data
- Designing the project structure

Tech stack: Unity, C#, Blender, git, Photoshop, Premiere-Pro, team-management

Co-Founder, OrthrusGames

October 2022 – PRESENT

Work Environment

Developing personal projects as a team of two. We learned to manage ourselves, use our free time to learn, and bring our ideas to life.

- Designing and developing personal projects in **Unity** and **C#**
- Modeling, rigging, and animating custom characters
- Designing the project architecture in **C#**
- Setting deadlines for ourselves and respecting them
- Testing and debugging the projects
- Delivered 2 projects

Tech stack: Unity, C#, Blender, git, Photoshop, team-management

Unity Developer Intern, Midnight Works (<https://midnight.works/>)

October 2022 – March 2023
Moldova

Work Environment

Worked in a team of 10 junior developers and 3 mid-senior developers. The mid-senior developers were there in case anyone was stuck, mostly focused on their projects, and we had one team manager who was monitoring the progress

Responsibilities and accomplishments

- Migrated Games from PC/Mobile/Nintendo to PS4 and PS5
- Implemented a traffic system for a driving game in **C#**
- Implemented the trophy system for the PlayStation Console
- Implemented new game mechanics to deliver a better product
- Optimized projects for a 30-60% better frame rate
- Developed **Unity** Windows to automate some of the migration processes
- Developed a **C#** code base to ease and fasten the migrating process
- Set up a friendly atmosphere within the team
- Quickly overtook the mid-senior developer's responsibility to train newcomers

Tech stack: Unity, C#, Blender, PlayStation, git

Studies

- Bachelor's Degree in Computer Science at "Alexandru Ioan Cuza" University, Iasi, Romania
2019-2022
